profile

My BA degree in Visual Media helped me gain a strong understanding of visual communication and a fluency in the Adobe Creative Suite and Final Cut. My MSc then allowed me to combine my design background with game design and development where I worked on a number of projects.

Having developed strong analytical and problem solving skills during the courses, I am able to self manage well, work under pressure and meet deadlines. I am eager to continue learning new skills and gaining more experience and I am always striving for self improvement, whether it be professionally and personally.

education

2009 - 2012

BA (Hons) in Journalism and Visual Media

Griffith College Dublin, 1st Class Honours
Specialised in Visual Media.

2013 - 2015

MSc in Creative Digital Media

Dublin Institute of Technology, 1st Class Honours
